

Github Pages

Content only Projects

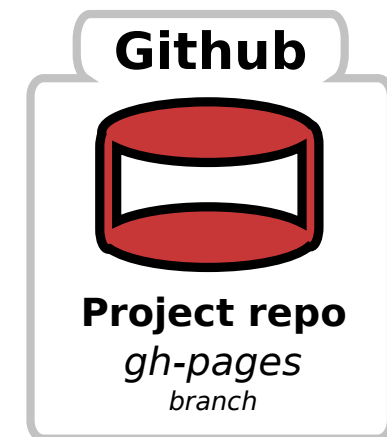

jr0cket.github.io/developer-guides

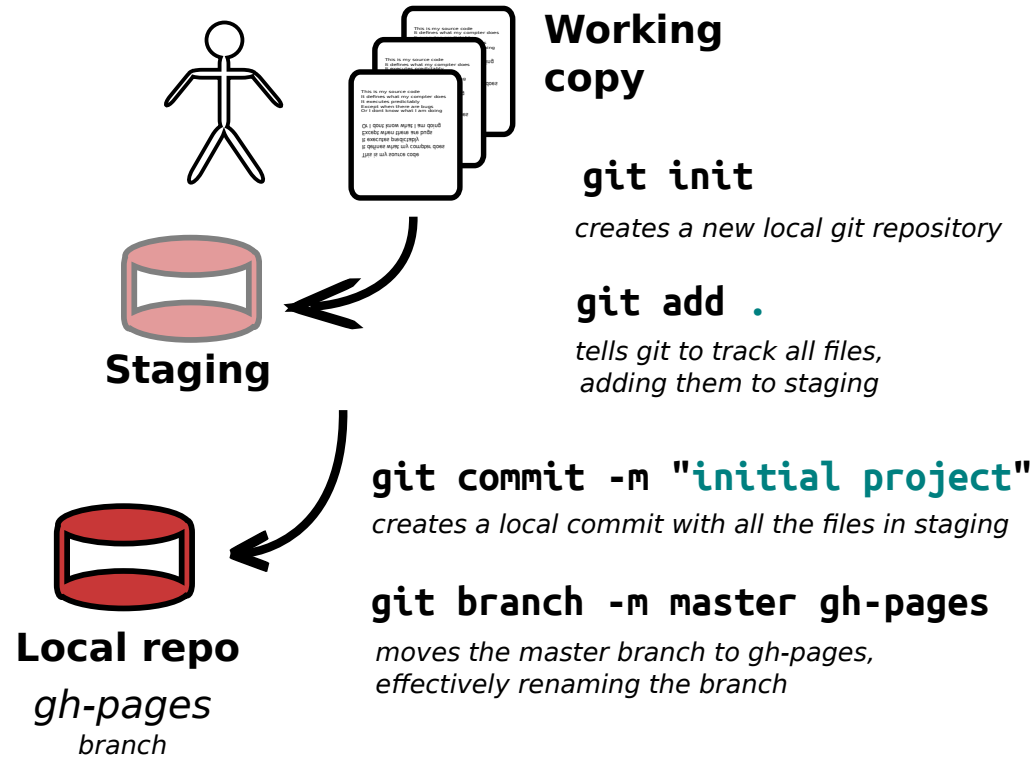

account.github.io/project

published website

may take a few seconds to update

Local Git Workflow

`hub create project-name -d "description"`

Creates a new repository on Github.

Alternatively use the Github website if you do not have hub installed

`git push github gh-pages`

push the local commits on the gh-pages branch to the github repository gh-pages branch
